Text › Color accuracy ›

We know some colors are just painfully hard to distinguish. We're here to help you recognize them more vividly, but we need your help: select the patterns which are the most indistinguishable to you.

It's recommended to reduce the amount of cold light at night, for a better sleep. Choose the level of warm light you would like to have, by scrolling the side bar.

Cold

Warm

Tell us when the warmer light should start acting and when it should stop, to better fit your sleeping schedule.

Sunrise

Sunset
